

## Reaction Paper 2

**Assignment:** Write a 2-2.5 page reaction paper to the first half of *Ebola* (p. 1-65). *Ebola* is written as a piece popular science writing, meaning that it is meant to inform a reader who has a basic knowledge of science. In this instance, the author is seeking to give a historical context and scientific understanding of the ebolavirus.

Follow the specification for reactions papers (found on UBLearn if you don't have your original sheet) and construct your reaction to *Ebola*. After giving a summary of the relevant information of the text through page 65, make 2-3 points about the content of the text.

**Things to Consider:** What was explained well in the text? How did it change your perceptions? What did you want to know more about that wasn't explained in the text? What could have been elaborated on more?

### **Citation:**

Quammen, D. 2014. *Ebola: The Natural and Human History of a Deadly Virus*. New York: W.W. Norton & Company.

### **Format of the Reaction Papers**

**Font:** Times New Roman, size 12

**Line Spacing:** 1.5 spaces, no space before or after

**Margins:** 1" all sides

**Between Paragraphs:** No additional spacing

**Paragraphs:** Indented

**Alignment:** Justified

**Length:** 2 – 2.5 pages

**Citation Style:** APA (below as an example), Size 11 font

**In Text Citation:** (Quammen 2014)

**In Text Citation after Direct Quote:** (Quammen 2014, p. 206)

Or just page number

Ex: As stated by Quammen (2014) "quote" (p. 206).

**Direct Quotes:** At least 2 direct quotes are required for each reaction paper. Over use of quotes to pad the paper will result in a deduction of points.
